(54) PATTERN SEARCHING DEVICE

(57)Abstract:

PURPOSE: To provide a pattern searching device which efficiently searches a specific pattern from a searching object expressed as a network consisting of a set of nodes and an arc between the nodes.

CONSTITUTION: This device is provided with a search pattern input part 11 which inputs a pattern to be retrieved, a search order designation part 12 to designate the search order of the node included in a search pattern by a user, a general search order knowledge input part 13 which inputs general search order knowledge not depending on the search pattern, a search order synthesis knowledge input part 15 which inputs search order synthesis knowledge to synthesize search order, a search order synthesis part 17 which synthesizes new search order from the search order designated by a user, a search order edit part 18 which edits synthesized search order, and a search engine 19 which searches the search pattern from the searching object according to finally obtained search order.

LEGAL STATUS

[Date of request for examination] 17.12.1999

[Date of sending the examiner's decision of rejection] 25.02.2003

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
